

Health Leads Model

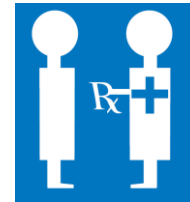

1. Families seek medical care at one of Health Leads' 15 clinical partner Institutions.

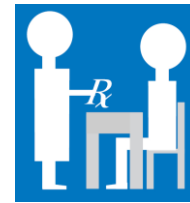

2. Families complete pre-visit survey to screen for unmet resource needs.

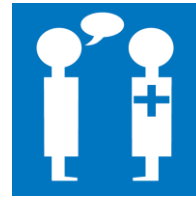

3. Healthcare provider addresses basic resource needs and refers to Health Leads

4. Patient brings referral prescription to Health Leads' Advocates, who assist families in accessing basic resources like food, clothing, fitness programs, and housing.

5. Health Leads Advocates follow up with families.

6. Health Leads Advocates provide updates to the healthcare provider.
